

BASKETBALL AND VOLLEY BALL COURT

When the CLS playing field was completed in 2014, a basketball court was provided at one end. This was open to the weather and the relentless sun – an exposed and hot environment.

In 2015 an Australian donor provided US\$20,000 to construct an enclosure over the court. This would provide a large covered area suitable for basketball, volley ball and class games, and as a sheltered space for school assemblies and events.

Deep foundations were laid, tall pillars were constructed, and a steel framework was fixed in place to support the roof and sides.

Cladding for the roof and sides completed the structure.

The covered area is an outstanding addition to the CLS buildings. It is used regularly for volleyball, basketball and a variety of class games.

It is also an ideal space for school assemblies and other events such as Reading Days and scholarship presentations.

It allows such events to go ahead without concern about downpours in the wet season, and without participants being “baked” by the blistering sun in the dry season.
